

2.1P: In Person Check-in 1 – Answer Sheet

1. Briefly describe your prior experience with programming.

Most of my experience with programming is with Basic Ruby, basic Js, CSS, HTML, PHP and recently very basic Assembly

2. Based on what you have seen so far, what do you think will be most challenging about this unit?

I only got a C in Ruby and barely did any heavy lifting in PHP and did some basic stuff in Assembly so this is not looking good. Hardest part is probably to code the damn thing itself as my skill is not that good

3. What can you do to prepare yourself for that challenge (resources you can use, approach to studying etc.)?

As for right now I'm trying to do the lab(setting things up was a nightmare) and watch OOP in C# on youtube

4. Is there anything you think the teaching staff should know to best help you this semester?

If I don't really know what I am doing or should be doing, I'll be very shy to ask. Pls Pls just come ask me if I'm having trouble figuring things out
